FRIDAY KVENING, NOV'R. 11, 1891.

The recent election in this State established one of two facis: that argrees are not people, or the fallicy of the Latin provert, vex populi vox dei; for the voice of God terones that men should pay what they owe, but the negroes of Virginia, by their solid vote, determined, not that they would refuse to pay their portion of the State debt-that they should was pever expec ed-but that the property owners of the Siste, the people from whom the taxes are colhoted, and who want to pay the State debt in tex receipts given them by Masay's calecters. order to promote her, and, consequently, their le Richard, it is stated, one of these collecowo, welfare should not be allowed to do so

General Mahone's home organ says: "We trust that the ladies still remain faithful

chough to Daniel to send him a bouquet to solace him in his defeat."

The trust will not be disappointed, and the flowers will be sprinkled with the tears of s'l the waite women of Virginia, who, like their fathers, husbands, brothers, and sweethearts. love their old State, and weep for the dishonor put upon her by a few deserters from the deme shorte.

The effect of the recent cleation in this State upon her securities is about as follows : Console! and should they be fore d on the market a still forther decline will probably take place. But died from insasity, and it is understood that his both classes are held by strong parties, who, basing their purchases upon the decision of the highest tribunal in the land, will be loth to part with them at a loss.

The tax-payers of Virginia are now for the first time in the history of the State under the absolute control of those who pay no taxes. Those who have no property will fix the rate of taxation on what belongs to their more indes trious, conomical and thrifty neighbors. Such case. is the result of negro votes when "dextremely" managed.

It isn't probable that Governor Holliday will make the present the occasion of breaking a long-assablished role and for issuing a proclamation declaring the 24 h lest, a day of State, as it is of national thanksgiving.

Upon the ides that a legitimate scurce of gratification is found in the worst condition of human sillairs, for the reason that any subsequent change must be for the better, the people of Virginia should not be as those without hope, for certainly no worse fate can befall them than that of last Tuesday

White Virginians are amused with the lifes that at the next session of the U. S. Senate, the bloody shirt radicals of that body will march under the command of a "rebe! brigadier,' and keep step to the tune of Dixic.

Now that the repudiators, by the united support of the negroes and republicans, have oltained possession of the State, "what will they do with it?" is the absorbing question with every true Virginian.

'The American Newspaper," an essay read before the Social Science Association at Saratoga Springs September 6, 1831, by Charles Budley Warner, has been received from the publishers, James R. Osgood & Co., Boston. This is a handy volume, well bound, and can be carried in the vest pocket. The erray abounds in pract cal suggestions as to how a newspaper should be conducted, and Mr. Warner shows that he possesses a remerkable insight into every department of journalism. Tais essay is an invaluable adjunct to a newspaper office, and should be read from the press room to the eanctum.

A faw years ago Dr. Piezzi Smyth, the artranomer Royal of Scotland, after a careful ex amination of the great pyramid of Egypt, published a book, entitled "Our Inheritates in the Great Pyramid," in which this learned man advated the theory that the various passages and galicries in this huge edifice were intended to represent the different religious dispensations of the world, and that it was probably built under divice inspiration. The autodilusian, Nonobio, patriershial, Mosnie, Chuich, Judgment and Messianio ages were all supposed to be portrased in pyramidio inches, and the opision was advanced that the present religious economy would terminate in the year 1881the grand gallery, representing the same, mentpriog that number of inches. People, of course, always love the marvelons, and as a natural consequence the book was presured and read by every impulsive, exaitable-tempered character who had the intelligence to comprehend the wonderful deductions set forth. While many who read it regarded it more for its inguruity than its prophetical import, it could not be depied that the purpose for which the author believed the pyramid was built was about as plausible as these given by the majority of Egyptologists; but now that the sands of the present year (in which these wonders were supposed to commesce) are about to run out, and "all things continuing as they were," the last article and disgram of this "piller in the land of Egypt" makes the number of lookes in the grand gallery 1882-31 and it is probable the world will be kept on the verge of the close of this dispensation notil the same really terminetes, if paramid figures are to be relied on,

It is stated, ie, that the entire amount of mency received by the State executive committee from all sources was less than \$12,000, and that with \$10,000 more with which the expitation lex of white voters cou'd have been paid the result would have been different. Then, teo, it is said that several of the democratic speakers in the State declined to take any part in the can vass; but that the less from this cause was little or nothing, and that, on the contrary, it may bave been the cause of gain, is shown by the result in Sussex county, where not a single democratic speech was made during the entire compaige, but where there was a gain of 700 votes. The solid negro vote was at questionably the sole and only effective strength the repudiators had, and it is understood to be an estatliabed feet that is all quarters of the State negroes voted by thousands upon fraudulent tors called at the reems of the democratic committee a day or two before the election, told the secretary that his conscience bothered him

After the misutes of the Ostober meeting were read, the president asked W. H. Scow den what constituted "pocket fertilizers?"

The Captain replied that, in his opicion, all so called superphosphates that had been so manipulated, that a very small percentage of plant food was emmingled with a large amount of said or earthy substence, for which an exorbitant price was asked Same of these sc-called fereil zers, he considered, positively injurious to vegetation.

A leng by discussion followed, in which it was said that difference in coil and evasons should be considered, and also, the requireminis of the crop to be growe.

It was generally agreed that many of the commercial fertilizers in the market were ontirely too high priced for the amount of plant food they contain; that farmers should experiment connected with any fertilizer that was not clearing of the ground upon Mount Meriah, made and sold by perfectly reliable parties.

The Election in Virginia.

S. C. Peyton is defested for the Legislature from Stafford and King George by Daff Green. Powall, readjuster, is elected Sanator over Sat tle, democrat, having carried all three counties

The following is the efficial vote of King George county: For Governor-Comeron 746, Daniel 362. For House of Delegates-Green essition | 743, Perton [dem.] 360.

Returns come in slowly, but continue to show gains on the part of the oralitionists, capcoinly in the Scu hwest, where it was expected the democratic resejunters would decline to follow Mahane iato the republican eamp. The Rictmond Whiz claims that Cameron's majority will reach 16,000. So far the returns indicate 3500, and it is not improbable that they will go up to 12 000.

The Bisic Wilson letters instead of burting Blair seem to have had the opposite effect, and so far as returns have been received they show that be has run aboad of his ticket, especially is the Southwest. In this same quarter Lewis | tion of 4,000 or 5,000. lagged behind. The cause for these losses on the part of the latter are ascribed to bis course

ss U. S. Marshal in that region. The Richmond Dispatch concedes Cameron's election by 5,000 to 6,000 mejority, and summarizes the legislative result in the State as follows: Secate, democrats, 17; readjusters, 23. House, democrate, 42; readjusters, 55; doubtful, 3. This would give the readjusters 19 majority on joint ballor, without counting the three doubtful seats. There are two colored members in the Senate and eleven in the House of Delegates.

There are of course any number of theories advanced by the democrats to account for their defeat. The most prominet of these is mis management. As to the nomination of Daniel, all seem to espeede that no stronger per better man could have been named.

Jemes A. Frezier, reedjuster candidate for the Legislature in Reckbridge, who was defeated for the Legislature by seventy-eight votes, as stated in yesterday's Gizatto, will contest the seat of his opponent. So e stain is he of obtaining favorable consideration at the hands of the resojusters in the House of Delegates that he has chosen his old seventy-five votes, and claims that he has evidence to show that a large number of Virginia Military Institute ordets and students from Washington and Lee University voted against him. Captain John S. Wise, who will probebly act as Mr. Frazier's couesel, has gone to exington to investigate the affair. If Mr. Frezier should not succeed in getting back his seat, it is certain that his porty will reward him

with some good effice.
It is said that one or more republicans will have seals in the Supreme Cours of Appeals. Who these will be is not yet definitely known, but it is believed, with good reeson, that Lawis will be rewarded with one of these positions. It is thought that Judgo Staples will be retained. Jedge Burks was elected to fill the unxpired term of Judge Booldin, deceased. It is a disputed question whether his term expiron with the other members or holds over for the full term. In the latter event it is thought possible that the readjusters will retain him, as ho was elected through the leftuonee of some of

that paris. One important step, it is understood, will be taken by the coalitionists to gain possession of Richmond, and that is the amendment of the city charter so as to have the mercepolitan olies, who will be appointed by a committee the Legislature occated for the purpose. they will also probab'y redistrict the city, so as to exment their hold in the next election. The imperiant question is the election of a United States Senstor. Unless given a Cabinet posiion it is thought John S. Wise will be the strongest candidate for this place. It is againstrongest condidate for this risce. It is easert the republican State committee last night the cd that Mahone himself would take a pisce in resignation of the Hon. James G. Bisho as the Cabinet if terdered, and Wise and Riddleberger be sent to the Senate; but these in position to know say Mahone wou'd rather keep his present place.

Maso, read., is elected from Westmoreland and Nerthumberland, and Riehmond and Lincaster are also carried by the readjusters. Cameron's majority in Richmond county is

"Bon't Know Half their Value."

"They cured me of Ague, Biliousness and Kidney Complaint, as recommended. I had a half bottle left which I used for my two little girls, who the doctors and neighbors said could not be cured. I would have lost both of them one night if I had not given them Hop Bitters. They did them so much good I continued their use until they were cured. That is why I say you do not know half the value of Hop Bittere, and do not recommend them high enough."-B
